End-User License Agreement for Logitech Gaming LED SDK....35

The user has the option to block games from changing the lighting via a setting in the Logitech Gaming Software (version 8.35 and newer). This option is located under the General settings tab of Logitech Gaming Software.
The SDK is a Windows based API for C/C++ programmers. Games based on the Microsoft Win32 API do not access hardware directly. Instead, the Logitech Gaming LED SDK interacts with supported Logitech devices on behalf of the games.
Logitech Gaming Software 8.55+ is required to enable this SDK's features.

SDK Package

The following files are included:

- LogitechLEDLib.h: C/C++ header file containing function prototypes
- LogitechLEDLib.lib: companion lib file to access DLL exported functions (32 and 64 bit)

Requirements

The Logitech Gaming LED SDK can be used on the following platforms:

- Windows XP SP2 (32-bit and 64-bit)
- Windows Vista (32-bit and 64-bit)
- Windows 7 (32-bit and 64-bit)
- Windows 8 (32-bit and 64-bit)

The Logitech Gaming LED SDK is a C based interface and is designed for use by C/C++ programmers. Familiarity with Windows programming is required.

Interfacing with the SDK

Using LogitechLed.h and LogitechLed.lib to access LogitechLed.dll

The application can include LogitechLEDLib.h and link to LogitechLEDLib.lib (see "Sample usage of the SDK" further below or sample program in Samples folder). The lib file loads the dll LogitechLed.dll that ships with Logitech Gaming Software 8.55+, therefore if Logitech Gaming Software is not installed in the host machine, the SDK won't work.

Available colors

Different devices have different capabilities. They range from full single-key RGB support to single color only.
Details for supported devices are found further below in "Features of lighting-capable Logitech Gaming devices".
The SDK has a single function to set the backlighting color and takes values for R(ed), G(reen), B(lue). The way it deals with single color devices is to take whichever of the R, G, and B values is the highest and apply it. This is important to remember, because if for example rotating through colors, the game should make sure to alternate the maximum numbers as it rotates so that the effect on a single color device would be noticeable too.

Multiple clients using the SDK at the same time

The SDK allows only one client to control backlighting at any given time. In case two applications try to initialize the SDK, the latest one will take over control.

Features of lighting-capable Logitech Gaming devices

G910 Orion Spark / G910 v2 Orion Spectrum

Colors

Single key RGB support. This keyboard supports all the functions available in the SDK, both per-key lighting and full keyboard lighting.

G810 Orion Spectrum

Colors

Single key RGB support. This keyboard supports all the functions available in the SDK, both per-key lighting and full keyboard lighting.

G610 Orion Brown & Orion Red

Colors

Single key Monochrome support. This device accepts all the functions for devices of type LOGI_DEVICETYPE_PERKEY_RGB. It will only display the highest value for R,G,B on each key.

PRO Mechanical Gaming Keyboard

Colors

Single key RGB support. This keyboard supports all the functions available in the SDK, both per-key lighting and full keyboard lighting.

G213

Colors

Supports full RGB and Zones.

Supported Zones			
Zone ID	**Zone Name**	**Zone ID**	**Zone Name**
0	Entire Keyboard	3	Right Side
1	Left Side	4	Arrow keys side
2	Center Side	5	Numpad keys side

G410 Atlas Spectrum

Colors
Single key RGB support. This keyboard supports all the functions available in the SDK, both per-key lighting and full keyboard lighting.

G710+

Colors
Single color only. Full resolution. Highest value for R, G or B defines brightness.

G633 & G933

Colors
Supports full RGB and Zones.

Supported Zones			
Zone ID	**Zone Name**	**Zone ID**	**Zone Name**
0	Logo (on both left & right side)	1	Back side (the stripe on both left

			& right side)

G600

Colors

Supports full RGB, will work with the SDK only if set to Host mode through Logitech Gaming Software.

G510/ G510s

Colors

Supports full RGB.

G110

Colors

Supports full R(ed) and B(lue), but not G(reen). When calling the SDK's LogiLedSetLighting function, values for green will be ignored.

G19 / G19s

Colors

Supports full RGB.

G105

Colors

Single color only. Full resolution. Highest value for R, G or B defines brightness.

G105 Call Of Duty

Colors

Single color only. Full resolution. Highest value for R, G or B defines brightness.

G300

Colors

Supports red on/off, green on/off, blue on/off, or a combination of the three. When calling the SDK's LogiLedSetLighting function, if the percentage given is below 50, the color will be off, and when above 50, the color will be on.

G900 Chaos Spectrum & G903

Colors

Supports full RGB and Zones.

Supported Zones			
Zone ID	**Zone Name**	**Zone ID**	**Zone Name**
0	DPI Indicator	1	Logo

G303 Daedalus Apex

Colors

Supports full RGB and Zones.

Supported Zones			
Zone ID	**Zone Name**	**Zone ID**	**Zone Name**
0	Side lighting	1	Logo

G403 & G703

Colors

Supports full RGB and Zones.

Supported Zones			
Zone ID	**Zone Name**	**Zone ID**	**Zone Name**
0	Scroll wheel	1	Logo

PRO Gaming Mouse

Colors

Supports full RGB and Zones.

Supported Zones	
Zone ID	**Zone Name**
0	Logo and Side lighting

POWERPLAY

Colors

Supports Full RGB and Zones.

Supported Zones	
Zone ID	**Zone Name**
0	Logo

G11

Colors

Single color only, 3 levels of brightness. When calling the SDK's LogiLedSetLighting function, if the highest RGB percentage given is below 33, the color will be off, if between 33 and 66, the brightness will be low, and when above 66, the brightness will be high.

G13

The SDK treats this device as a keyboard.

Colors

Supports full RGB.

G15 v1

Colors

Single color only, 3 levels of brightness. When calling the SDK's LogiLedSetLighting function, if the highest RGB percentage given is below 33, the color will be off, if between 33 and 66, the brightness will be low, and when above 66, the brightness will be high.

.

G15 v2

Colors

Single color only, 3 levels of brightness. When calling the SDK's LogiLedSetLighting function, if the highest RGB percentage given is below 33, the color will be off, if between 33 and 66, the brightness will be low, and when above 66, the brightness will be high.

Do's and Don'ts

These are a few guidelines that may help you implement 'better' support in your game:

- If you don't use the LogiLedSetTargetDevice function, remember that some devices have only a single color. They will work fine if flashing a red warning light for example (their color will flash), but if rotating lighting try to make sure that the max value of the three colors goes up and down so that single color devices will have their brightness go up and down.
- Whenever doing a temporary lighting effect, do not forget to save the current lighting (using LogiLedSaveCurrentLighting function) just before starting the effect, and then restoring the lighting (via SDK's LogiLedRestoreLighting function) right after the effect is finished. This only applies to user defined effects, the saving-restore lighting is already included in the preset effects (LogiLedFlashLighting and LogiLedPulseLighting).
- When calling LogiLedSetLighting, Logitech Gaming Software will make sure to not override current brightness for devices that only support single color. Therefore, setting the lighting to 100% red, on a G710+ it will result in a max brightness according to the user hardware settings.

Sample usage of the SDK

```
#include " LogitechLEDLib.h"

…

LogiLedInit();
// Be sure to do other things to give some time before calling LogiLedSetLighting()

…

// Save current lighting before starting some temporary effect
LogiLedSaveCurrentLighting();

…

int red = …;
int green = …;
int blue = …;

LogiLedSetLighting(red, green, blue);

…
// Call per-key lighting effects
LogiLedSetLightingForKeyWithKeyName(keyboardNames::ARROW_DOWN, red, green, blue);

…
// Possibly call effect functions
LogiLedFlashLighting(red, green, blue, duration, interval);
…

LogiLedPulseLighting(red, green, blue, duration, interval);
```

```
// Restore previously saved lighting when effect is finished
LogiLedRestoreLighting();

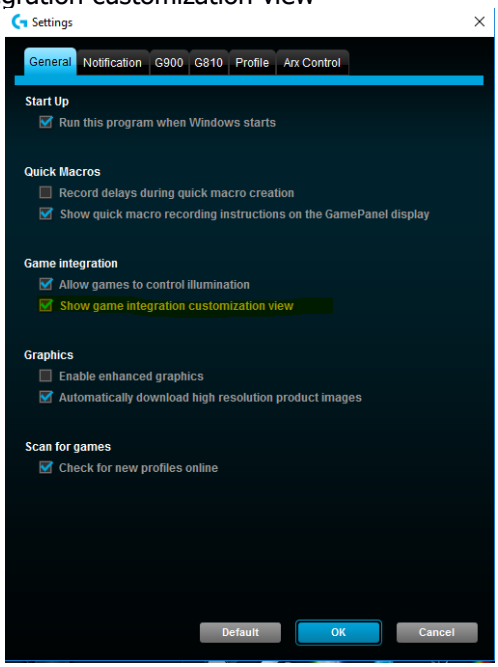
…

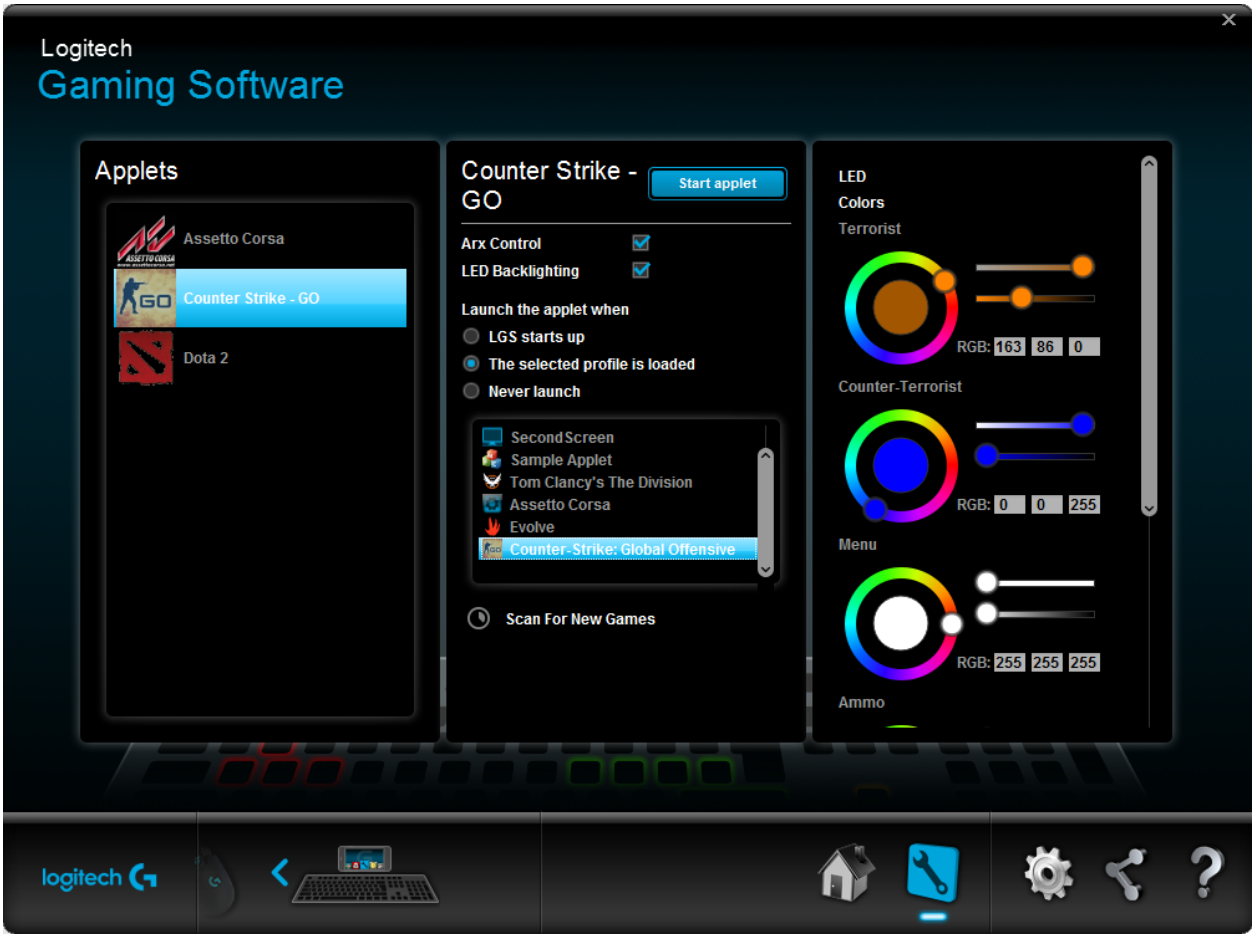
LogiLedShutdown();
```

Reference

ConfigOption Functions

The **LogiLedGetConfigOption** function set, allows the developer to query for an option set by the user and use that value to customize the interaction with the SDK. A call to any of these functions will create an entry in the Logitech Gaming Software – Applet Manager View. This view is disabled by default, since it's something targeting only "Advanced users", to enable it click on the Settings Icon in LGS and then check the box "Show Game integration customization view"





```
bool LogiLedGetConfigOptionNumber(wchar_t *configPath, double *defaultValue);

bool LogiLedGetConfigOptionBool(wchar_t *configPath, bool *defaultValue);

bool LogiLedGetConfigOptionColor(wchar_t *configPath, int *defaultRed, int
*defaultGreen, int *defaultBlue);

bool LogiLedSetConfigOptionLabel(wchar_t *configPath, wchar_t *label);
```

Parameters

- **configPath**: This identifies the option uniquely. This can be just a string (E.G. “Terrorist”) or it can be a two level tree (“Colors/Terrorist”). If the two level tree is specified, the option will be displayed in Logitech Gaming Software as an entry (“Terrorist”) inside a group (“Colors”).
- **defaultValue**: This parameter, depending on the specific function takes the default value for the relative option. If the option has been modified through LGS by the user, it will be filled in with the modified value, otherwise the default value will be saved (to be shown to the user) and it won’t be modified.

Return value
The function always returns true, unless some bad parameter has been specified.

Usage Example

```
double healthFlashingThreshold = 0.15;
LogiLedGetConfigOptionNumber(L"player/flashing_edge", &healthFlashingThreshold);
//This healthFlashingThreshold value will now contain the option as set by the user,
or the default value if it has never been set.

//This function is just to display a prettier name in the LGS customization
interface.
LogiLedSetConfigOptionLabel(L"player/flashing_edge", L"Flash Health Percentage");

if(player.health() < healthFlashingThreshold)
{
      LogiLedFlashLighting(100, 0, 0, 0, 100);
}
```

LogiLedInit
The **LogiLedInit**() function makes sure there isn't already another instance running and then makes necessary initializations. It saves the current lighting for all connected and supported devices.
This function will also stop any effect currently going on the connected devices.

```
bool LogiLedInit();
```

Return value
If the function succeeds, it returns true. Otherwise false.
If it returns false, means that the connection with Logitech Gaming Software is broken, make sure that it is running.

LogiLedGetSdkVersion
The **LogiLedGetSdkVersion**() function retrieves the version of the SDK version installed on the user's system.

```
bool LogiLedGetSdkVersion(int *majorNum, int *minorNum, int *buildNum);
```

Parameters
- majorNum: [in] the function will fill this parameter with the major build number of the sdk installed in the system
- minorNum: [in] the function will fill this parameter with the minor build number of the sdk installed in the system
- buildNum: [in] the function will fill this parameter with the build number of the sdk installed in the system

Return value
If the function succeeds, it returns true. Otherwise false.

If it returns false, means that there is no SDK installed on the user system, or the sdk version could not be retrieved.

LogiLedSetTargetDevice

The **LogiLedSetTargetDevice**() function sets the target device type for future calls. The default target device is LOGI_DEVICETYPE_ALL, therefore, if no call is made to LogiLedSetTargetDevice the SDK will apply any function to all the connected devices.

```
bool LogiLedSetTargetDevice(int targetDevice);
```

Parameters

- targetDevice: one or a combination of the following values:

```
LOGI_DEVICETYPE_MONOCHROME
LOGI_DEVICETYPE_RGB
LOGI_DEVICETYPE_PERKEY_RGB
LOGI_DEVICETYPE_ALL
```

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called, the parameter is wrong, or if the connection with Logitech Gaming Software was lost.

Example

```
LogiLedInit();
LogiLedSetTargetDevice(LOGI_DEVICETYPE_RGB | LOGI_DEVICETYPE_MONOCHROME);
//From now on the calls to LED SDK will only affect RGB and MONOCHROME devices, PER_KEY
devices such as G910 will ignore this calls
LogiLedSetLighting(100,0,0);
…
LogiLedSetTargetDevice(LOGI_DEVICETYPE_PERKEY_RGB);
//Future calls will only affect per-key rgb devices such as G910.
LogiLedSetLightingForKeyWithKeyName(keyboardNames::ARROW_DOWN, 100, 0, 0);
LogiLedFlashLighting(50, 50, 50, 0, 300);
…
LogiLedSetTargetDevice(LOGI_DEVICETYPE_ALL);
//From now on we'll affect all the connected devices
LogiLedSetLighting(50, 0, 0);
…
LogiLedShutDown();
```

LogiLedSaveCurrentLighting

The **LogiLedSaveCurrentLighting**() function saves the current lighting so that it can be restored after a temporary effect is finished. For example if flashing a red warning sign for a few seconds, you would call the **LogiLedSaveCurrentLighting**() function just before starting the warning effect.
On per-key backlighting supporting devices, this function will save the current state for each key.

```
bool LogiLedSaveCurrentLighting();
```

Return value

If the function succeeds, it returns true. Otherwise false.

The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSetLighting

The **LogiLedSetLighting**() function sets the lighting on connected and supported devices.

```
bool LogiLedSetLighting(int redPercentage, int greenPercentage, int bluePercentage);
```

Parameters

- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

Remarks

Do not call this function immediately after LogiLedInit(). Instead leave a little bit of time after LogiLedInit().
For devices that only support a single color, the highest percentage value given of the three colors will define the intensity. For monochrome backlighting device, Logitech Gaming Software will reduce proportionally the value of the highest color, according to the user hardware brightness setting.

LogiLedSetLightingForTargetZone

The **LogiLedSetLightingForTargetZone**() function sets lighting on a specific zone for all connected zonal devices that match the device type.

```
bool LogiLedSetLightingForTargetZone(LogiLed::DeviceType deviceType, int zone, int
redPercentage, int greenPercentage, int bluePercentage);
```

Parameters

- deviceType: one of the device types from the enum `DeviceType`:
  - `Keyboard = 0x0,`
  - `Mouse = 0x3,`
  - `Mousemat = 0x4,`
  - `Headset = 0x8`
- zone: the zone ID to set lighting on. (For device zone IDs, consult "Features of lighting-capable Logitech Gaming devices")
- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

Example

```
LogiLedInit();

LogiLedSetTargetDevice(LOGI_DEVICETYPE_ALL);
// From now on the calls to LED SDK will affect all devices.
// Set all devices to be black
LogiLedSetLighting(0, 0, 0);

// Set zone 0 on headsets to red
LogiLedSetLightingForTargetZone(LogiLed::Headset, 0, 100, 0, 0);

// Set zone 1 on headsets to blue
LogiLedSetLightingForTargetZone(LogiLed::Headset, 1, 0, 0, 100);

LogiLedSetTargetDevice(LOGI_DEVICETYPE_RGB);
// From now on the calls to LED SDK will only affect RGB devices, not per-key.
// Set zone 3 on RGB keyboards to white
LogiLedSetLightingForTargetZone(LogiLed::Keyboard, 3, 100, 100, 100);

// Set zone 0 on mice to green
LogiLedSetLightingForTargetZone(LogiLed::Mouse, 0, 0, 100, 0);

LogiLedShutDown();
```

Remarks

This function will only affect devices with Zonal Lighting. This excludes keyboards with single key RGB support. Additionally, setting a zone will affect all connected devices of specified type.

LogiLedRestoreLighting

The **LogiLedRestoreLighting**() function restores the last saved lighting. It should be called after a temporary effect is finished. For example if flashing a red warning sign for a few seconds, you would call this function right after the warning effect is finished.
On per-key backlighting supporting devices, this function will restore the saved state for each key.

```
bool LogiLedRestoreLighting();
```

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedFlashLighting

The **LogiLedFlashLighting**() function saves the current lighting, plays the flashing effect on the targeted devices and, finally, restores the saved lighting.

```
bool LogiLedFlashLighting(int redPercentage, int greenPercentage, int bluePercentage, int
milliSecondsDuration, int milliSecondsInterval);
```

Parameters

- redPercentage: amount of red. Range is 0 to 100.

- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.
- milliSecondsDuration : duration of the effect in milliseconds, this parameter can be set to `LOGI_LED_DURATION_INFINITE` to make the effect run until stopped through **LogiLedStopEffects()**
- milliSecondsInterval : duration of the flashing interval in milliseconds

Return value
If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called, if the connection with Logitech Gaming Software was lost or if another effect is currently running.

LogiLedPulseLighting
The **LogiLedPulseLighting**() function saves the current lighting, plays the pulsing effect on the targeted devices and, finally, restores the saved lighting.

```
bool LogiLedPulseLighting(int redPercentage, int greenPercentage, int bluePercentage, int milliSecondsDuration, int milliSecondsInterval);
```

Parameters
- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.
- milliSecondsDuration : duration of the effect in milliseconds, this parameter can be set to `LOGI_LED_DURATION_INFINITE` to make the effect run until stopped through **LogiLedStopEffects()**
- milliSecondsInterval : duration of the flashing interval in milliseconds

Return value
If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called, if the connection with Logitech Gaming Software was lost or if another effect is currently running.

LogiLedStopEffects
The **LogiLedStopEffects**() function stops any of the presets effects (started from LogiLedFlashLighting or LogiLedPulseLighting).

```
bool LogiLedStopEffects();
```

Return value
If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSetLightingFromBitmap
The **LogiLedSetLightingFromBitmap**() function, sets the array of bytes passed as parameter as colors to per-key backlighting featured connected devices.

```
bool LogiLedSetLightingFromBitmap(unsigned char bitmap[]);
```

Parameters

- bitmap: a unsigned char array containing the colors to assign to each key on the per-lighting device connected. The size required for this bitmap is defined by `LOGI_LED_BITMAP_SIZE`

The array of pixels is organized as a rectangular area, 21x6, representing the keys on the device. Each color is represented by four consecutive bytes (RGBA).
Here is a graphical representation of the bitmap array:

byte 0-3 ESC	byte 4-7 F1	byte 8-11 F2	...	byte 72-75 NULL	byte 76-79 NULL	byte 80-83 NULL
byte 84-87 `	byte 88-91 1	byte 92-95 2	...	byte 156-159 /	byte 160-163 *	byte 164-167 -
...	...	...	...	...	...	...
byte 420-423 CTRL	byte 424-427 WIN	byte 428-431 ALT	...	byte 492-495 NUM0	byte 496-499 ./DEL	byte 500-504 NULL

A full mapping of the bitmap array is as follows for US layout:

Key	Bytes

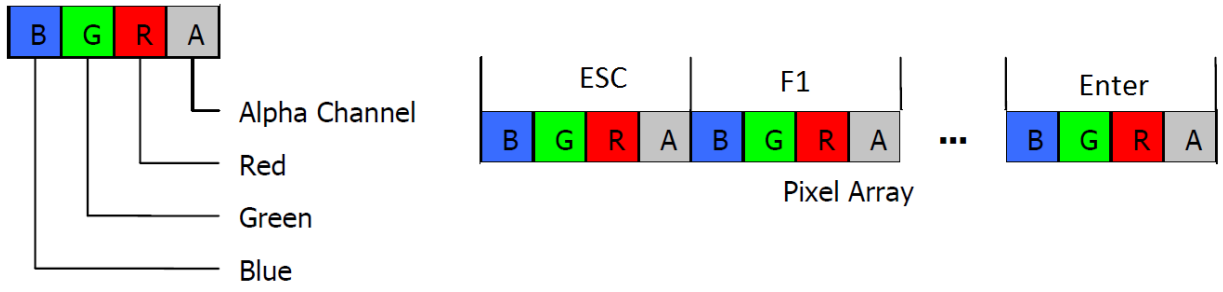
32 bit values are stored in 4 consecutive bytes that represent the RGB color values for that pixel. These values use the same top left to bottom right raster style transform to the flat character array with the exception that each pixel value is specified using 4 consecutive bytes. The illustration below shows the data arrangement for these RGB quads.



Each of the bytes in the RGB quad specify the intensity of the given color. The value ranges from 0 (the darkest color value) to 255 (brightest color value).

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

Remarks

The array passed in has to be allocated by the caller of the size `LOGI_LED_BITMAP_SIZE`. If the array is smaller, the function will apply the effect to a smaller portion of the keyboard and set everything else to black. If the array is bigger, the remaining part will be ignored. To create partial bitmaps and update only parts of the keyboard, set the alpha channel for the keys to ignore to 0. This will allow to update just portion of the keyboard, without overriding the other keys.

LogiLedExcludeKeysFromBitmap

The **LogiLedExcludeKeysFromBitmap**() function sets a list of keys, defined by keynames to be ignored when calling the function LogiLedSetLightingFromBitmap. This is useful when creating effects on the bitmap during gameplay loop, but still wanting to set some keys on top of that using the LogiLedSetLightingFromKeyName.

```
bool LogiLedExcludeKeysFromBitmap(LogiLed::KeyName *keyList, int listCount);
```

Parameters

- keyList: A preallocated array of LogiLed::KeyName(s) to be excluded when calling LogiLedSetLightingFromBitmap
- listCount: the number of items in the list KeyList

LogiLedSetLightingForKeyWithScanCode

The **LogiLedSetLightingForKeyWithScanCode**() function sets the key identified by the scancode passed as parameter to the desired color. This function only affects per-key backlighting featured connected devices.

```
bool LogiLedSetLightingForKeyWithScanCode(int keyCode, int redPercentage, int
greenPercentage, int bluePercentage);
```

Parameters

- keyCode: the scan-code of the key to set
- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSetLightingForKeyWithHidCode

The **LogiLedSetLightingForKeyWithHidCode**() function sets the key identified by the hid code passed as parameter to the desired color. This function only affects per-key backlighting featured connected devices.

```
bool LogiLedSetLightingForKeyWithHidCode(int keyCode, int redPercentage, int
greenPercentage, int bluePercentage);
```

Parameters

- keyCode: the hid-code of the key to set
- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSetLightingForKeyWithQuartzCode

The **LogiLedSetLightingForKeyWithQuartzCode**() function sets the key identified by the quartz code passed as parameter to the desired color. This function only affects per-key backlighting featured connected devices.

```
bool LogiLedSetLightingForKeyWithQuartzCode(int keyCode, int redPercentage, int
greenPercentage, int bluePercentage);
```

Parameters

- keyCode: the quartz-code of the key to set
- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSetLightingForKeyWithKeyName

The **LogiLedSetLightingForKeyWithKeyName**() function sets the key identified by the code passed as parameter to the desired color. This function only affects per-key backlighting featured connected devices.

```
bool LogiLedSetLightingForKeyWithKeyName(LogiLed::KeyName keyCode, int redPercentage, int
greenPercentage, int bluePercentage);
```

Parameters

- keyCode: one of the key codes from the enum `KeyName`:
  - `ESC = 0x01,`
  - `F1 = 0x3b,`
  - `F2 = 0x3c,`
  - `F3 = 0x3d,`
  - `F4 = 0x3e,`
  - `F5 = 0x3f,`
  - `F6 = 0x40,`
  - `F7 = 0x41,`

- F8 = 0x42,
- F9 = 0x43,
- F10 = 0x44,
- F11 = 0x57,
- F12 = 0x58,
- PRINT_SCREEN = 0x137,
- SCROLL_LOCK = 0x46,
- PAUSE_BREAK = 0x45,
- TILDE = 0x29,
- ONE = 0x02,
- TWO = 0x03,
- THREE = 0x04,
- FOUR = 0x05,
- FIVE = 0x06,
- SIX = 0x07,
- SEVEN = 0x08,
- EIGHT = 0x09,
- NINE = 0x0A,
- ZERO = 0x0B,
- MINUS = 0x0C,
- EQUALS = 0x0D,
- BACKSPACE = 0x0E,
- INSERT = 0x152,
- HOME = 0x147,
- PAGE_UP = 0x149,
- NUM_LOCK = 0x145,
- NUM_SLASH = 0x135,
- NUM_ASTERISK = 0x37,
- NUM_MINUS = 0x4A,
- TAB = 0x0F,
- Q = 0x10,
- W = 0x11,
- E = 0x12,
- R = 0x13,
- T = 0x14,
- Y = 0x15,
- U = 0x16,
- I = 0x17,
- O = 0x18,
- P = 0x19,
- OPEN_BRACKET = 0x1A,
- CLOSE_BRACKET = 0x1B,
- BACKSLASH = 0x2B,
- KEYBOARD_DELETE = 0x153,
- END = 0x14F,
- PAGE_DOWN = 0x151,

- NUM_SEVEN = 0x47,
- NUM_EIGHT = 0x48,
- NUM_NINE = 0x49,
- NUM_PLUS = 0x4E,
- CAPS_LOCK = 0x3A,
- A = 0x1E,
- S = 0x1F,
- D = 0x20,
- F = 0x21,
- G = 0x22,
- H = 0x23,
- J = 0x24,
- K = 0x25,
- L = 0x26,
- SEMICOLON = 0x27,
- APOSTROPHE = 0x28,
- ENTER = 0x1C,
- NUM_FOUR = 0x4B,
- NUM_FIVE = 0x4C,
- NUM_SIX = 0x4D,
- LEFT_SHIFT = 0x2A,
- Z = 0x2C,
- X = 0x2D,
- C = 0x2E,
- V = 0x2F,
- B = 0x30,
- N = 0x31,
- M = 0x32,
- COMMA = 0x33,
- PERIOD = 0x34,
- FORWARD_SLASH = 0x35,
- RIGHT_SHIFT = 0x36,
- ARROW_UP = 0x148,
- NUM_ONE = 0x4F,
- NUM_TWO = 0x50,
- NUM_THREE = 0x51,
- NUM_ENTER = 0x11C,
- LEFT_CONTROL = 0x1D,
- LEFT_WINDOWS = 0x15B,

- RIGHT_ALT = 0x138,
- RIGHT_WINDOWS = 0x15C,
- APPLICATION_SELECT = 0x15D,
- RIGHT_CONTROL = 0x11D,
- ARROW_LEFT = 0x14B,

- ARROW_DOWN = 0x150,
- ARROW_RIGHT = 0x14D,
- NUM_ZERO = 0x52,
- NUM_PERIOD = 0x53,
- G_1 = 0xFFF1,
- G_2 = 0xFFF2,
- G_3 = 0xFFF3,
- G_4 = 0xFFF4,
- G_5 = 0xFFF5,
- G_6 = 0xFFF6,
- G_7 = 0xFFF7,
- G_8 = 0xFFF8,
- G_9 = 0xFFF9,
- G_LOGO = 0xFFFF1,
- G_BADGE = 0xFFFF2

- redPercentage: amount of red. Range is 0 to 100.
- greenPercentage: amount of green. Range is 0 to 100.
- bluePercentage: amount of blue. Range is 0 to 100.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedSaveLightingForKey

The **LogiLedSaveLightingForKey**() function saves the current color on the keycode passed as argument. Use this function with the LogiLedRestoreLightingForKey to preserve the state of a key before applying any effect.
This function only applies to device of the family LOGI_DEVICETYPE_PERKEY_RGB.

```
bool LogiLedSaveLightingForKey(LogiLed::KeyName keyName)
```

Parameters

- keyName: The key to save the color for. A value from the LogiLed::KeyName enum.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedRestoreLightingForKey

The **LogiLedRestoreLightingForKey**() function restores the saved color on the keycode passed as argument. Use this function with the LogiLedSaveLightingForKey to preserve the state of a key before applying any effect.
This function only applies to device of the family LOGI_DEVICETYPE_PERKEY_RGB.

```
bool LogiLedRestoreLightingForKey(LogiLed::KeyName keyName)
```

Parameters

- keyName: The key to restore the color on. A value from the LogiLed::KeyName enum.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedFlashSingleKey

The **LogiLedFlashSingleKey**() function starts a flashing effect on the key passed as parameter. The key will be flashing with an interval as defined by msInterval for msDuration milliseconds, alternating the color passed in as parameter and black. This function only applies to device of the family LOGI_DEVICETYPE_PERKEY_RGB.

```
bool LogiLedFlashSingleKey(LogiLed::KeyName keyName, int redPercentage, int
greenPercentage, int bluePercentage, int msDuration, int msInterval)
```

Parameters

- keyName: The key to restore the color on. A value from the LogiLed::KeyName enum.
- redPercentage : amount of red in the active color of the flash effect. Range is 0 to 100.
- greenPercentage : amount of green in the active color of the flash effect. Range is 0 to 100.
- bluePercentage : amount of blue in the active color of the flash effect. Range is 0 to 100.
- msDuration : duration in milliseconds of the effect on the single key. This parameter can be set to `LOGI_LED_DURATION_INFINITE` to make the effect run until stopped through **LogiLedStopEffects()** or **LogiLedStopEffectsOnKey()**

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedPulseSingleKey

The **LogiLedPulseSingleKey**() function starts a pulsing effect on the key passed as parameter. The key will be pulsing with from start color to finish color for msDuration milliseconds. This function only applies to device of the family LOGI_DEVICETYPE_PERKEY_RGB.

```
bool LogiLedPulseSingleKey(LogiLed::KeyName keyName, int startRedPercentage, int
startGreenPercentage, int startBluePercentage, int finishRedPercentage, int
finishGreenPercentage, int finishBluePercentage, int msDuration, bool isInfinite);
```

Parameters

- keyName: The key to restore the color on. A value from the LogiLed::KeyName enum.
- startRedPercentage: amount of red in the start color of the pulse effect. Range is 0 to 100.
- startGreenPercentage: amount of green in the start color of the pulse effect. Range is 0 to 100.
- startBluePercentage: amount of blue in the start color of the pulse effect. Range is 0 to 100.
- finishRedPercentage amount of red in the finish color of the pulse effect. Range is 0 to 100.

- finishGreenPercentage: amount of green in the finish color of the pulse effect. Range is 0 to 100.
- finishBluePercentage: amount of blue in the finish color of the pulse effect. Range is 0 to 100.
- msDuration: duration in milliseconds of the effect on the single key.
- isInfinite : if this is set to true the effect will loop infinitely until stopped with a called to **LogiLedStopEffects()** or **LogiLedStopEffectsOnKey()**

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedStopEffectsOnKey

The **LogiLedStopEffectsOnKey**() function stops any ongoing effect on the key passed in as parameter. This function only applies to device of the family LOGI_DEVICETYPE_PERKEY_RGB.

```
bool LogiLedStopEffectsOnKey(LogiLed::KeyName keyName);
```

Parameters

- keyName: The key to stop the effects on. A value from the LogiLed::KeyName enum.

Return value

If the function succeeds, it returns true. Otherwise false.
The function will return false if **LogiLedInit**() hasn't been called or if the connection with Logitech Gaming Software was lost.

LogiLedShutdown

The **LogiLedShutdown**() function restores the last saved lighting and frees memory used by the SDK.

```
void LogiLedShutdown();
```

End-User License Agreement for Logitech Gaming LED SDK

THIS END-USER LICENSE AGREEMENT FOR LOGITECH GAMING LED SDK ("AGREEMENT") IS A LEGAL AGREEMENT BETWEEN YOU, EITHER AN INDIVIDUAL OR LEGAL ENTITY ("YOU") AND LOGITECH EUROPE S.A. ("LOGITECH") FOR USE OF THE LOGITECH GAMING LED SOFTWARE DEVELOPMENT KIT, WHICH INCLUDES COMPUTER SOFTWARE AND RELATED MEDIA AND DOCUMENTATION (HEREINAFTER "SDK"). **BY DOWNLOADING, INSTALLING, OR OTHERWISE USING THIS SDK, YOU ARE AGREEING TO BE BOUND BY THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, THEN YOU MUST STOP USING THE SDK AND DESTROY ANY COPIES OF THE SDK IN YOUR POSSESSION OR CONTROL.**

1 **License Grant.** Subject to the terms and conditions contained in this Agreement, Logitech grants You a limited, non-exclusive, royalty-free, non-transferable, non-sublicensable, world-wide, revocable license to: (i) install and use an unlimited number of copies of the SDK on Your computers solely for incorporation of the SDK into Your program or software ("Developer Software") and (ii) to distribute the SDK to an end user solely as part of the Developer Software. No other license under any patent, copyright, trade secret, trademark or other intellectual property right is granted to or conferred upon You by this Agreement. All other rights are reserved to Logitech.

2 **Restrictions.** When using the SDK, You shall not:

(a) reproduce incomplete copies of the SDK;
(b) distribute the SDK as a stand-alone product or make the SDK available for download via Your website or a third party's website;
(c) modify the SDK or alter any copyright, trademark, or legal notice contained in the SDK;
(d) include the SDK in malicious, deceptive, or unlawful programs or applications; and
(e) reverse engineer, decompile or disassemble any portion of the SDK, except and only to the extent that this limitation is expressly prohibited by applicable law.

3 **Feedback.** At Your option, You may provide reasonable feedback to Logitech, including but not limited to usability, bug reports and test results, with respect to the SDK. All bug reports, test results and other feedback provided to Logitech by You shall be the property of Logitech and may be used by Logitech for any purpose.

4 **Automatic Updates.** Logitech is not obligated to provide technical support or updates to You for the SDK provided to You pursuant to this Agreement. However, Logitech may, in its sole discretion, provide further pre-release versions, technical support, updates and/or supplements ("Updates") to You without providing any additional notice or receiving any additional consent, in which case such Updates shall be deemed to be included in the "SDK" and shall be governed by this Agreement, unless other terms of use are provided in writing by Logitech with such Updates.

5 **Ownership.** The SDK is licensed, not sold, to You for use only under the terms and conditions of this Agreement. Logitech retain all right, title, and interest, in and to the SDK and all intellectual property rights therein. The SDK is protected by intellectual property laws and international treaties, including U.S. copyright law and international copyright treaties. All rights not expressly granted by

Logitech are reserved.

6 Indemnification. You agree to defend, indemnify and hold harmless Logitech and its shareholders, directors, officers, employees and agents (collectively, the "Indemnified Party") against any and all losses, liabilities, damages, claims, administrative actions, costs of litigation and attorney's fees as may be incurred in defending any civil, criminal, or administrative action brought against the Indemnified Party that may arise or result from (i) Your breach or alleged breach of any provision of this EULA; (ii) third party claims that the Developer Software incorporated with the SDK infringes or misappropriates intellectual property rights of a third party; or (iii) Your failure to comply with any applicable federal, state or local law, regulations in the performance of its obligations under this Agreement.

7 **Disclaimer of Warranty.** TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, LOGITECH PROVIDE THE SDK (IF ANY) "AS IS," WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND. LOGITECH EXPRESSLY DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD-PARTY RIGHTS WITH RESPECT TO THE SDK AND ANY WARRANTIES OF NON-INTERFERENCE OR ACCURACY OF INFORMATIONAL CONTENT. LOGITECH DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE SDK, THAT THE FUNCTIONS CONTAINED IN THE SDK WILL MEET YOUR REQUIREMENTS, THAT THE OPERATION OF THE SDK OR SERVICES WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE SDK OR SERVICES WILL BE CORRECTED. NO LOGITECH AGENT, OR EMPLOYEE IS AUTHORIZED TO MAKE ANY MODIFICATION, EXTENSION, OR ADDITION TO THIS WARRANTY. Some jurisdictions, such as New Jersey, do not allow exclusions of implied warranties or limitations on applicable statutory rights of consumers, so the above exclusions and limitations do not apply in New Jersey and may not apply to You.

8 **Limitation of Liability.** IN NO EVENT WILL LOGITECH OR ITS LICENSORS BE LIABLE FOR ANY COSTS OF PROCUREMENT OF SUBSTITUTE PRODUCTS OR SERVICES, LOST PROFITS, LOSS OF INFORMATION OR DATA, OR ANY OTHER SPECIAL, INDIRECT, CONSEQUENTIAL, OR INCIDENTAL DAMAGES ARISING IN ANY WAY OUT OF THE SALE OF, USE OF, OR INABILITY TO USE THE SDK OR ANY LOGITECH PRODUCT OR SERVICE, EVEN IF LOGITECH HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO CASE SHALL LOGITECH'S TOTAL LIABILITY EXCEED THE ACTUAL MONEY PAID FOR THE SDK GIVING RISE TO THE LIABILITY. The foregoing limitations will apply even if the above stated remedy fails of its essential purpose. Some jurisdictions, such as New Jersey, do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply in New Jersey and may not apply to You. The above limitations will not apply in case of personal injury where and to the extent that applicable law requires such liability.

9 **SDK Limitations**. THE SDK IS NOT INTENDED FOR USE IN THE OPERATIONS OF NUCLEAR FACILITIES, AIRCRAFT NAVIGATION OR COMMUNICATION SYSTEMS, AIR TRAFFIC CONTROL SYSTEMS, MEDICAL DEVICES OR OTHER EQUIPMENT IN WHICH THE FAILURE OF THE SDK COULD LEAD TO DEATH, PERSONAL INJURY, OR SEVERE PHYSICAL OR ENVIRONMENTAL DAMAGE. YOU ACKNOWLEDGE THAT THE SDK IS NOT CERTIFIED FOR EMERGENCY PURPOSE AND SHOULD NOT BE USED FOR THIS PURPOSE. LOGITECH DOES NOT MONITOR EMERGENCY NOTIFICATIONS, AND IS NOT

RESPONSIBLE FOR DISPATCHING EMERGENCY SERVICES TO YOUR HOME.

10 **U.S. Government Rights.** Use, duplication, or disclosure of the software contained in the SDK by the U.S. Government is subject to restrictions set forth in this Agreement and as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013(c)(1)(ii) (OCT 1988) FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52.227-14 (ALT III), as applicable. Logitech Inc. 7600 Gateway Blvd, Newark, CA 94560.

11 **Export Law Assurances.** You agree and certify that neither the SDK nor any other technical data received from Logitech will be exported outside the United States except as authorized and as permitted by the laws and regulations of the United States. If You have rightfully obtained the SDK outside of the United States, You agree that You will not re-export the SDK nor any other technical data received from Logitech, except as permitted by the laws and regulations of the United States and the laws and regulations of the jurisdiction in which You obtained the SDK.

12 **Termination.** This Agreement is effective until terminated. Upon any violation of any of the provisions of this Agreement, Your rights to use the Logitech SDK shall automatically terminate and all copies of the SDK destroyed. You may also terminate this Agreement at any time by destroying all copies of the SDK in Your possession or control. If Logitech makes a request via public announcement or press release to stop using the copies of the SDK, You will comply immediately with this request. The provisions of paragraphs 5, 6, 7, 8, 9, 12, 13, 14, and 15 will survive any termination of this Agreement.

13 **Agents and Third Party Purchasers**. If You are downloading the SDK on behalf of another person or entity, You represent and warrant that you have the authority to bind the party or entity for which You are downloading the SDK to the terms and conditions of this Agreement. You represent that You are of sufficient legal age in Your jurisdiction to use or access the SDK and to enter into this Agreement.

14 **Controlling Law; Severability**. If You are in the U.S.A., this Agreement will be exclusively governed by and construed in accordance with the laws of the United States and the State of California, without regard to or application of its choice of law rules or principles. If You reside outside the U.S.A., this Agreement will be exclusively governed by the laws of Switzerland. If any provision of this Agreement is found to be invalid, the parties agree nevertheless that the parties' intentions as reflected in the provision, and the other provisions of this Agreement shall remain in full force and effect.

15 **Entire Agreement; Governing Language**. This Agreement sets forth the entire agreement between You and Logitech and supersedes all prior agreements, written or oral, with respect to the SDK. Any translation of this Agreement is done for local requirements and in the event of an inconsistency between the English and any non-English version, the English version of this Agreement will govern.

ADDITIONAL INFORMATION FOR MAC OS ONLY

ADDITIONAL TERMS FOR MAC APPLICATION SOFTWARE
If Yu are using the SDK on any Mac Device, in addition to the above, the following terms and conditions also apply to Your use of the SDK:

A. Acknowledgement. The terms and conditions of this Agreement are concluded between You and Logitech only, and not with Apple, Inc. ("Apple"). In addition, Logitech, not Apple, is solely responsible for the SDK and the content thereof. You agree to comply with any applicable third party terms of agreement when using the SDK. You and Logitech acknowledge and agree that Apple, and Apple's subsidiaries, are third party beneficiaries of this Agreement, and that, upon Your acceptance of the terms and conditions of this Agreement, Apple will have the right (and will be deemed to have accepted the right) to enforce this Agreement against You as a third party beneficiary thereof.
B. Maintenance and Support. You and Logitech acknowledge that Apple has no obligation whatsoever to furnish any maintenance and support services with respect to the SDK.
C. Warranty. To the maximum extent permitted by applicable law, Apple will have no warranty obligation whatsoever with respect to the SDK, and any other claims, losses, liabilities, damages, costs or expenses attributable to any failure to conform to any warranty will be Logitech's sole responsibility.
D. Product Claims. You and Logitech acknowledge that in the event of any third party claim that the SDK or Your possession and use of the SDK infringes that third party's intellectual property rights, Logitech, not Apple, will be solely responsible for the investigation, defense, settlement and discharge of any such intellectual property infringement claim.
E. Intellectual Property Rights. Logitech, not Apple, is responsible for addressing any claims of the end-user or any third party relating to the SDK or Your possession and/or use of that SDK, including, but not limited to: (i) product liability claims; (ii) any claim that the SDK fails to conform to any applicable legal or regulatory requirement; and (iii) claims arising under consumer protection or similar legislation.
F. Legal Compliance. You represent and warrant that (i) You are not located in a country that is subject to a U.S. Government embargo, or that has been designated by the U.S. Government as a "terrorist supporting" country; and (ii) You are not listed on any U.S. Government list of prohibited or restricted parties.
If You have questions, complaints or claims regarding the SDK, please direct them to devtechsupport@logitech.com. Logitech Europe S.A.'s address is Quartier de l'Innovation, Daniel Borel Innovation Center, CH-1015 Lausanne, Switzerland.
